

Assemble International Hygiene Kits for communities affected by poverty or disaster

Your group can provide personal hygiene items and reach out to those who do not have access to basic but critical items that promote good health and sanitation.

Be a part of the solution to provide kids and families the supplies they need to keep clean and prevent sickness and disease both in their daily lives or in the case of a disaster.

How it works

Companies, churches, and community organizations purchase supplies through World Vision, host an event and assemble the kits. Once your kits are completed World Vision will arrange the pickup and ship them to those in need.

“

Keeping myself clean and hygienic makes me happy... I wash my hands before eating meals and after using the toilet. This prevents us from falling sick. Because I fall sick less I am able to attend school regularly.

-Yukti, age 9
