

Helping with Kelly Street Community Garden Needs:

One of the longer-term projects of North Coast United Methodist Church that has focused on community interaction has been our community garden. Non-Church members and Church members alike have used this plot of land to have a place in Oceanside to enjoy being outside and interact with nature.

As we know, ware and tare come to all things through time and broader maintenance needs become a needed conversation focus. Even the smallest need requires financial support.

If you are interested in helping support the garden's future maintenance needs, you can give online at NorthCoastUMC.org, in the special offering line, please write "community garden."

Thank you for your prayers and support of this long-standing community project. See a slide show and find out more about the Kelly Street Cooperative Garden <http://www.loveatncumc.org/cooperative-garden.html>
