

## **Enhanced COVID-19 Protocols**

We take your concerns about children, family and staff safety very seriously. In addition to the procedures already in place, we are adding/emphasizing the following:

- Please keep your child home if *\*anyone\** in your family has signs of illness.
- Per pediatrician advice: if your child has been sick, please keep them home until they are fever free for *\*at least 48 hours\** and, in case of a lingering cough or slightly stuffy nose, 10 days from the onset of illness,
- We will be asking specific questions upon arrival at school regarding your child and family's health.
- If you travel, children may not return to school for 7 days (if there are no signs of illness in your child, family, or people you've been in close contact with) or have a negative COVID result. Situations vary, so if you have questions regarding this, please ask us.
- Please take your child's temperature before leaving home. We will take it again when they arrive at school. 98.6 is our allowable temperature (in warmer weather we realize children's temps can read high, and in colder weather temps can read low). If temps register above 98.6, we will wait a few minutes and take it again. Hats can interfere with temperature taking, so we ask that children not wear them to school.
