

NATATORIUM SPECIALISTS

(4-8-20)

Dear Mary,

Efficient Air Systems is pleased to play a continuing role as a sponsor/exhibitor for YMCA events nationwide. We truly missed seeing old friends and making new. It is a different world without the YMCAs able to perform their mission, and we extend our sincere wishes for health and strength to the entire YMCA family in their return to that mission.

In these times where air quality becomes more important, our strength in meeting (and exceeding) CDC guidelines for outside air requirements can become part of the solution. We strongly believe that as Natatorium Specialists, our offering of free evaluations and engineering services, in addition to our line of dehumidifiers manufactured here in the USA; we are presenting goods and services that align with healthy living and social responsibility. This is accomplished by addressing air quality and operating cost better than any manufacturer with our green technology, and simplicity. Finally, we provide our YMCA clients exclusively with a direct factory relationship, despite having Sales Representatives in many regions.

Prayers to you all,

Your Efficient Air team

Patrick Beaudoin
